This also may be a great opportunity to work together on an important site and project. Everyone is heavily committed, perhaps good to discuss and get on the same page and help each other with schedule and workload.

Actually if Thabet is willing to do this, I can drop out since I have many reviews going on. I originally did not see him being copied.

Hi Dave-

A coordination meeting with you guys and Ed would be good. What days work best? Thurs and Fri might be the first openings for many due to the program reviews this week. Also we should talk about when we are going out there again. Can we stay for more than a day? That last trip wiped me out. You could tell, I was sleeping in the third row seat on the way back!

I also think we should get Jon and Coleen on a separate call once we get all of our needs worked out, and ask them what they think would be good areas of work to proceed with. I'm thinking it would at least be nice to have July data put into the overall analysis Jon's conducted to this point. Also, I'd like their written comments on the contingency plans pt 1 and 2.

Do we need to have a quick coordination meeting on this part of the support for West Lake LF?

Ed, Thabet,

At Cecilia's request I am forwarding the six workplans for the Supplemental Supplemental Feasibility Study at West Lake Landfill and the comments the State of Missouri and EPA HQ have generated on those workplans.

Please review and provide your own comments on the SSFS workplans as you see fit. I am trying to organize a meeting in mid-to-late September (weeks of September 16th and 23rd) where the PRPs can ask questions and get clarification on EPA and State of Missouri comments on these workplans prior to revising the workplans and beginning the work. I'd like your comments before then so the PRPs can have a look at them prior to the meeting. Please let me know your availability to participate those weeks by conference line or in person.

The site-specific time charging code for this work is 2013 T 07WD 303DD2 0714BD01.

Sincerely,
Daniel R. Gravatt, PG

Dan, go ahead and send the workplans and all comments received so far to Dr. Barth. Also it looked like Thabet was interested so you can copy him.

Subject: Plan review

Hi Cecilia-

Dr. Ed Barth indicated that he may be able to provide a review of the regrading/capping plan for the rad waste site we discussed. If possible, please have the RPM for the site send a hard-copy of the plan to Ed for his review.

I hope this is helpful.

Thank you,

John
